

Hi/Performance Nozzles are a direct replacement for our standard nozzles and easily fit into the same handpieces

20% tighter focus of the abrasive resulting in less overspray and a cleaner hole

New design increases wear resistance up to 3 – 4 times over standard nozzles

High Performance Nozzles are a direct replacement for our standard nozzles and fit in the same handpieces. Available in:

MB 1520-18 .018"	MB 1520-46 .046"
MB 1520-30 .030"	MB 1520-60 .060"

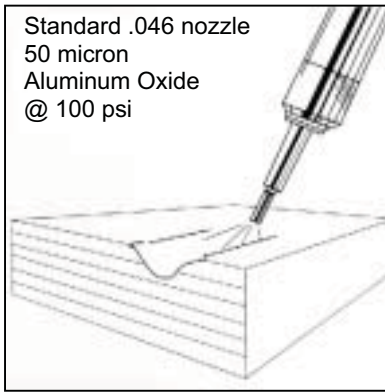

SHARPER DEFINITION

INCREASED CUT RATE

LONGER NOZZLE LIFE

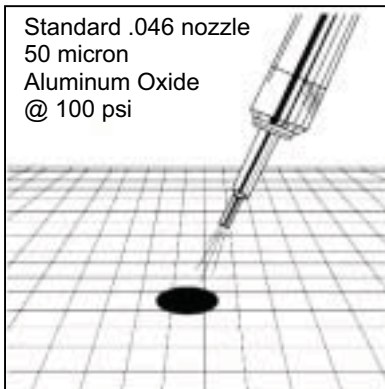

- A tightly focused abrasive blast results in less overspray and a cleaner cut
- New nozzle shape designed to increase efficiency – saving time and money
- Increased productivity gained from not having to stop the process to replace or realign nozzle tips as often
- Improved nozzle design dramatically increases wear resistance compared to any standard nozzle

Standard Nozzle

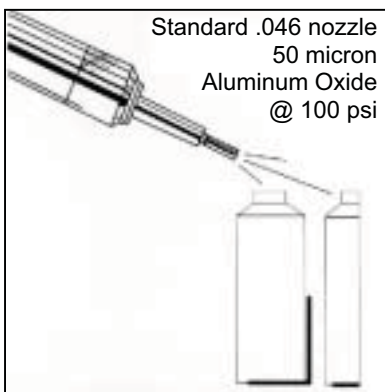

Cut Rate

The rate will depend on the abrasive material and the operating pressure

Focus

Although the blast pattern is small, there will be an area of overspray

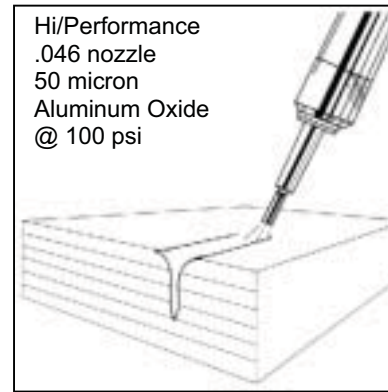

Nozzle Life

The standard nozzle is a balance between nozzle life and cost for the average application

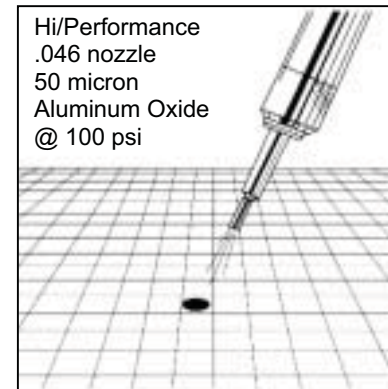

VS

Hi/Performance Nozzle

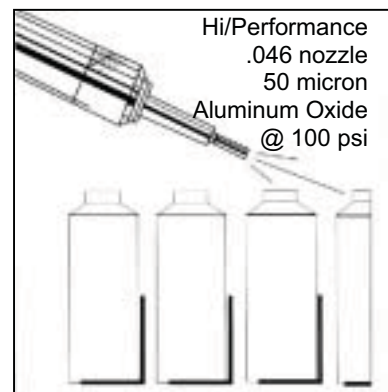

Cut Rate

New nozzle shape produces 25 – 30 % greater efficiency meaning more work in less time

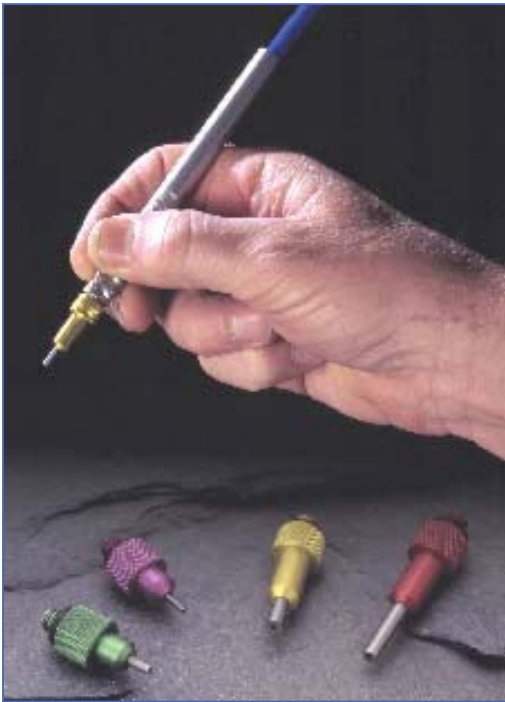

Focus

A 20% tighter focus of the abrasive means less overspray and a cleaner hole

Nozzle Life

New design increases wear resistance up to 3-4 times over standard nozzles

HI / PERFORMANCE

nozzles by Comco

*Providing Superior
Performance

Comco's Micro-Abrasive Blasting System Components

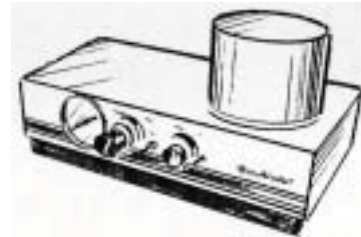

Air Dryers

Abrasive Media

MicroBlaster

Dust Collectors

WorkStations

Comco's *Hi/Performance* nozzles last longer, increase productivity, and provide greater focus for your micro-abrasive blasting applications than conventional nozzles. Contact us today for information on how a complete micro-abrasive blasting system from Comco can help you with applications requiring selective cleaning, focused cutting, precision deburring, material removal or surface preparation.
