

# Micro-Abrasive Blasting *Solutions* for Dental Labs

Devesting Pressable Ceramics

■  
Surface Preparation of Metal Alloys prior to Opaquing

■  
Removal of Oxides from Surface of Porcelain Crowns

■  
Selective Texturing of Dental Appliances

■  
Shaping Tooth Anatomy

## ***The Comco Difference: Power, Performance & Reliability***

Comco, the industry leader in micro-abrasive blasting technology, confidently guarantees that our blasters will perform with unequaled power and precision in your dental lab.

Unlike the inefficient, diffused blast of venturi style or 'pot' blasters, all Comco MicroBlasters are equipped with our patented modulator system. This ensures a well defined, consistent, and sharply focused stream of abrasive delivered with every blast. The speed and power of our MicroBlasters drastically reduce the time required for all of your applications.

Comco manufactures a wide range of micro-abrasive blasting systems to meet the specific needs of dental labs. A micro-abrasive blasting system consists of an abrasive blasting unit, work station, dust collector, air dryer, and appropriate media and nozzles.

Call us today for help in selecting the ideal micro-abrasive blasting system for your dental lab.

# Micro-Abrasive Blasting For Dental Labs

Micro-abrasive blasting is a simple, yet highly effective, method of using very small abrasive particles to clean, cut, or texture a wide variety of materials and surfaces, including those commonly used in dental labs. The process provides uniform mixing of abrasive media with an air stream and then propelling it out of small nozzle tips at high velocity.

Compact and lightweight, the ergonomically designed handpiece is held as easily as a pencil, allowing the operator to direct the abrasive with comfort and pinpoint accuracy.

*Comco MicroBlasters remove investment materials from pressable ceramics with record speed and pinpoint precision.*

*Surface preparation prior to opaquing is expertly accomplished with a MicroBlaster.*

*With Comco's MicroBlaster, the operator can point the abrasive stream accurately for shaping tooth anatomy.*

*MicroBlasters can clean oxidation and selectively texture a variety of dental appliances.*

***Ask us about our \$95 Lease exclusively for Dental Labs.\****

Comco offers affordable, low interest lease options for as little as \$95 a month.\* With our low-cost payment plan, there's no reason why your lab shouldn't benefit from top of the line equipment that will make your work easier and faster without increasing your monthly overhead.

*\* Rates are subject to credit review and approval. Other conditions may apply.*

# ***This is what we do best: We build MicroBlasters that last!***

Time /S money – and when your lab is brought to a halt with unreliable equipment, it severely impacts your profitability.

At Comco, we take pride in building the finest micro-abrasive blasters in the industry. Engineered to last year after year, our durable MicroBlasters feature robust construction for reliable performance. The hardened fittings, minimal components, and simple design result in far less downtime than any competitive blaster.

The MicroBlaster delivers the power, precision and flexibility to perform a variety of applications. Our blasters are ideal for the quick removal of investment materials, delicate shaping of tooth anatomy, and careful cleaning of gold, titanium and porcelain surfaces. The MicroBlaster is Comco's best-selling machine among America's leading dental labs.

**Process  
Flexibility**

**Durability**

**Technical  
Support**

For over 30 years, Comco has been justifiably proud of the equipment we engineer and of our people who build and test every MicroBlaster.

Our micro-abrasive blasters are backed by superior service and support. Our experienced customer service representatives and technical specialists are well trained to handle your questions or concerns in a friendly and timely manner. Additionally, we offer a comprehensive one year warranty.

At Comco, we firmly believe that our products and our support team are the finest in the industry.

***You've probably heard about the unequalled quality  
of our MicroBlasters from your colleagues.  
Now is the time to step up to the best for yourself.***
